Subject: The compromised Muwekma Ohlone Park and Sanctuary - let us not forget this mishap - ever.
Date: Thursday, October 20, 2022 10:44:56 AM

Let us not forget the mishap - compromising the Force Main by Pier 80.

Four conduits were drilled under the Main Force - an 8 feet pipe and compromised.

To this date, the Force Main functions with a bandaid - it will cost millions to fix the problem.

While this problem has not been resolved - a glaring example of how inept and corrupt SF Public Utilities - the reason this project was carried on - to challenge PGE then - as it does today - that continues to waste millions of dollars:
